

SEIDOR

hub OS

Get the best version of your hotel operations

Hub OS is the most automated and flexible operating system to maximize your hotel's performance, from the opening to operations and management. Hub OS makes operation easier by simplifying communication between departments and reducing response time, and they utilize an offline app that allows a non-interrupted use in zones without internet access. Also, Hub OS embraces business intelligence by providing global and detailed analytics with advanced KPIs to ensure a continuous improvement of hotel processes, and it supplies an ideal PMS component that focuses on delivering a 5 star service to your hotel guests.

Benefits of Hub OS

1 single platform
8 solutions connected

Fully integrated

Offline App
operation

Hub OS Modules

Maintenance

Management of preventive and corrective maintenance of the hotel

Housekeeping

Guest in Touch

Contactless communication between the guest and the hotel

Corporate Management

Management of contracts, suppliers, orders, and capex at a corporate level

Why Hub OS?

700+ leading hotels across 30+ countries

Customer Success

“The system is very intuitive and user friendly. When the training of all the staff was finished, we start working with the tool in normal conditions and the few doubts that we may had were solved immediately by HUB team.

Without a doubt Hub OS tool is very powerful, both in daily operations and in analytics. The reports allow you to have a clear idea of the work load, workers needed and guests complaints anticipation. HUB team is always open for the system improvement proposals and adaptations to your business.

Hub OS is totally recommended, our experience is very good.”

Hub OS helps 700+ leading hotels across 30+ countries around the world.
