

Fueling growth thanks to streamlined process with **SAP Business One**[®]

The Green Flame Gas Co., one of the leading companies in Kuwait working in the field of gas, turned to Seidor One when their existing software was failing to keep pace with their company's rapid growth. By opting to implement SAP Business One, management can now access and approve data online, saving valuable time and resources.

Before: Challenges and Opportunities

- The Green Flame Gas Co.'s previous software couldn't cope with their incremental growth.
- New software was required that could handle processes across all five divisions seamlessly.

Why SAP Business One and Seidor One Middle East

- SAP Business One is a solution that can grow with businesses to meet their continually changing requirements.
- Seidor One Middle East is incredibly knowledgeable and dedicated to making the most out of every SAP platform.
- The Seidor One Middle East team is always available to help with any issues and to implement any add-ons to fulfil their customers' needs.

After: Value-Driven Results

- Since implementation, paperwork and admin has reduced dramatically.
- Managers no longer need to manually sign paperwork, instead approving electronically.
- Invoices are much easier to produce.
- All five divisions are operating off the same platform.
- The Green Flame Gas Co. now has a successful online system for their products.

"SAP Business One and Seidor One have become **reliable partners** within our business."

Bashar Al Qattan - Chief Executive Officer, The Green Flame Gas Co.

Enhanced control over all operations

since implementation of SAP Business One
