Construction Competency Centre

Made up of a team of consultants specialising in the construction sector and real estate development, SEIDOR has a Construction Competency Centre (CCC) where it develops specific applications and all related businesses. This expert team has taken part in numerous implementations for leading customers over the last 15 years.

The CCC allows all tasks to be coordinated and complemented, reducing redundancies and increasing efficiency. Guarantees communication and access to applications and best practices at all levels of your organisation.

Benefits

All-in-one management of all areas of the company, eliminating information "islands" for quick decision-making, data uniqueness and traceability. Operability thanks to a single mature and tested solution with fast implementation and start-up period. Global solution that supports growth and internationalisation processes: legal and fiscal localisation, multi-company, multi-language, multi-currency, exchange insurance, etc.

Vertical solution, tailored to the real problems of the real estate development sector. Scalable, modular solution that allows for easy adaptation to functional needs at all times. Constantly evolving and innovating solution thanks to the role of the SEIDOR Construction Competency Centre and the continuous incorporation of innovative technology implemented in the leading customers in the sector worldwide.
