

Document downloader add-on for SAP Business ByDesign

Extract attached and output documents from SAP Business ByDesign

The screenshot shows the 'Customer Invoice Document Extractor' add-on in the SAP Business ByDesign interface. The interface includes a search bar at the top with 'All Categories' and 'Search Everything'. Below the search bar, there are tabs for 'Customer Invoice Document Extractor' and 'Customer Invoice ...'. The main section contains a form with the following fields:

- Extraction ID: 2
- Company: 1000
- Description: Extraction ABC
- Initial Posting Date: 01.01.2023
- End Posting Date: 31.12.2023
- Number of documents: 0
- Download Date: 04.04.2024 23:24
- Execution Status: 1 - Not Started
- Initial Document Date:
- End Document Date:

Below the form, there are tabs for 'Customer', 'Document Type', 'Status', and 'Sales Unit'. The 'Customer' tab is selected, showing a list of customers with a search bar and a 'Remove' button. The 'Attachments' section shows a table of attachments:

Download	Document Title	Document Type	Created On	Created By	File Size
	Customer Invoice F112-188-2023	Standard Attachment	04.04.2024 23:25	Lutovic Dumas	11 KB
	Customer Invoice F112-188-2023	Standard Attachment	04.04.2024 23:24	Lutovic Dumas	10 KB
	Customer Invoice F112-170-2023	Standard Attachment	04.04.2024 23:24	Lutovic Dumas	10 KB
	Customer Invoice F112-171-2023	Standard Attachment	04.04.2024 23:24	Lutovic Dumas	10 KB
	Customer Invoice F112-172-2023	Standard Attachment	04.04.2024 23:24	Lutovic Dumas	10 KB

Details: Customer Invoice F112-188-2023

User Story

SAP Business ByDesign contains documents for supplier invoices in attachment folder, and customer invoices in output history.

As a user, you can go through any invoice and download the documents related to it. When there are several invoices to download you must go 1 by 1 in a repetitive and time-consuming work.

With this add-on you will be able to download invoice documents massively.

Benefits for customers

1. Comply with legal requirements and audits while investing less time and resources.
2. Help your customers quickly and effortlessly when they need copies of your invoices.
3. Query invoice packages based on several fields made available in the filter.
4. Access control through the company access context.
