

Mastering maritime tech solutions with a little ERP magic

Before: Challenges and opportunities

- Seeking to improve reporting and compliance capabilities
- Need for better operations oversight and real-time analytics for better decision-making
- Aiming to meet customer demands more efficiently and enhance sales performance

Why SAP Business One and Seidor

- Solution provides a robust, consolidated platform with cutting-edge one-click reporting tools, along with automation to eliminate manual errors and rationalize resources
- Solution provides real-time data and analytics for vanguard inventory management
- Partner deemed dedicated and highly proficient; responsive in issue resolution
- Partner provided fast delivery, high standards and excellent cooperation throughout

After: Value-driven results

- Elevated financial reporting standards company-wide
- Total operations oversight with critical indicators to reduce weaknesses, errors and wastage
- Boosted overall efficiency
- Optimized supply chain management
- Streamlined, more efficient sales performance and customer service

“SAP Business One means success. It’s a highly worthy investment. It has taken our work standards to the next level, and we now enjoy the benefits of accuracy and efficiency.”
