Fast Deployment Packages for SAP ByDesign

Rapid implementation solutions

SEIDOR has developed a set of isolated and independent functionalities that can increase the productivity of your business on a daily basis.

- ✓ Developed, tested and rapidly implemented

Why SEIDOR

We are one of the main SAP Partners in Spain in the implementation of the ERP Cloud SAP Business ByDesign.

We have been recognized as **Best Resellers** in several years and our extensive experience with the ERP has led us to **develop several ADDONS** (complementary solutions to the ERP) that have helped to expand and improve certain features, and to certify (by the manufacturer SAP) several "PLUG AND PLAY" solutions for our customers.

Seidor es miembro de United VARs
Platinum Partner de SAP.

The background features two large, semi-transparent blue circles. One is in the top right corner, and the other is in the bottom left corner, both overlapping the white background.

Finance

Financial Solutions

Finance

FUNCTIONALITY	DESCRIPTION	PRICE
Automatic execution of SII	Solution for the automatic release of the submission of invoices to the SII. After establishing a monthly execution per company for incoming and outgoing invoices, the system will automatically and daily collect invoices pending to be sent and send them to the AEAT. It includes a report with the status of the sending and errors.	850€ Deployment 50€ Monthly Fee
Bank Confirming	Generation of file in AEF unified standard format for payments to suppliers through bank confirming. Admits specific adaptations required by certain banking entities.	850€ Deployment 50€ Monthly Fee
Prorata	Proprietary add-on to manage the pro-rata in Spain, improving management at company level in all procurement processes.	850€ Deployment 50€ Monthly Fee
Migration Transfer of historical data	The accumulated balance of the book accounts and open positions is migrated to the accounting cut-off date with the start of operations in SAP ByDesign at the go-live date.	Price upon request
Bank statement automation	Helps automate bank reconciliation, allowing all recurring items to be reconciled automatically.	550€
Customer claims management (for collection)	Set up dunning notices or payment reminders to customers for amounts due, generating a dunning proposal list.	Price upon request

Financial Solutions

Finance

General conditions

- All **prices** mentioned are **without taxes**.
- Deployment prices include work for **2 tenants** (test and production).
- These **prices** are effective for the year **2024**.
- Billing for packages containing a monthly **fee will** be quarterly **in advance**.
- The **monthly fee** is for the maintenance of the functionality through each new release of SAP ByDesign, every quarter. SEIDOR also improves the functionality, from time to time, including some small changes that might be needed, but there is no commitment on new features, on changes in any standards or new regulations.
- It is necessary to sign a **EULA agreement** to articulate how the subscription works.
